

Smoke Alarm Instructions to Occupants

If your smoke alarm goes off:

- Turn off stove or appliance that is the source of smoke.
- Open all suite windows.
- Turn on all exhaust fans.
- Fan air in the direction of your smoke alarm.

DO NOT open your suite doors to vent smoke into the corridor. **This activates the main building fire alarm system.**

If you cause a false alarm, strata may fine you, as the fire department charges for false alarms.
